

THE STATE OF UTAH  
OFFICE OF STATE ENGINEER  
SALT LAKE CITY

WAYNE D. CRIDDLE  
STATE ENGINEER

JULY 31, 1964

R. Strong  
Leaven, Utah

Dear Mr. Strong:

Reference is made to my letter of June 1, 1959 and to the table set out therein concerning distribution of certain rights on the Beaver River. By the way of elaboration and clarification, the following additional directions are now issued:

1. For the purpose of applying the table, the total diversions for the eight rights are totaled.
2. Column 3 is concerned with the allocation of the first 100 cfs., before June 1 of each year.
3. After June 1 of each year, when the total divertable flow exceeds 100 cfs., it shall be prorated to the eight canals in accordance with the percentages set up in column 4.
4. After June 1 of each year if this total flow is less than 100 cfs., the first 4.5 cfs. shall be allocated to the parties in the amounts as set up in column 5. The remainder of this flow in the river shall be prorated to the eight canals in accordance with the percentages set up in column 4.

We trust that there should now be no question as to our determination of this matter.

Yours very truly

Donald C. Noresth  
Distribution Engineer
